

MOHAMED AYMAN

Frontend Developer — React.js & Next.js

📍 Cairo, Egypt 📞 +20 106 013 2785 ✉ mohayman080@gmail.com 🔗 [LinkedIn](#) 🐙 [GitHub](#) 🌐 [Portfolio](#)

Professional Summary

Frontend Developer building responsive web applications with React.js, Next.js, and TypeScript. Experienced in reusable component architecture, REST API integration, SSR/SSG, state management, and multilingual Arabic/English (LTR/RTL) user experiences. Currently expanding into full-stack development with Node.js, Express.js, and MongoDB.

Technical Skills

- Languages:** TypeScript, JavaScript (ES6+)
- Frontend:** React.js, Next.js (App Router), HTML5, CSS3, React Router
- State & Data:** Redux Toolkit, Zustand, TanStack Query, REST API Integration
- UI & Styling:** Tailwind CSS, shadcn/ui, Sass, Framer Motion, Responsive Web Design, RTL Interfaces
- Forms & Validation:** React Hook Form, Zod
- Backend (Supporting):** Node.js, Express.js, MongoDB, PostgreSQL, Mongoose, JWT, Socket.IO
- Tools & Workflow:** Git, GitHub, Vercel, Postman, Code Splitting, Lazy Loading

Professional Experience

Puiux Company

Nov. 2025 – Dec. 2025

Frontend Developer — Mansoura, Egypt

- Built reusable, type-safe interfaces with React, Next.js, and TypeScript for production web applications.
- Applied SSR and SSG in Next.js to improve initial rendering, SEO readiness, and content delivery.
- Integrated REST APIs and Zod validation to strengthen form reliability and reduce unhandled client-side errors.

CodeBox Company

Feb. 2024 – May 2025

Frontend Developer — Mansoura, Egypt

- Developed 30+ reusable React components, standardizing UI behavior and reducing duplicate implementation across projects.
- Separated server-state from UI-state by pairing REST API integration with Redux Toolkit, centralizing shared client state and simplifying data flow across product screens.
- Reduced initial bundle size and improved page load times by implementing route-based code splitting and lazy loading for non-critical components.

Projects

Taleora – Personalized Children’s Books Platform

Next.js, TypeScript, Tailwind CSS, Zustand, Google Gemini API, Upstash Redis, Telegram Bot API, Zod 2026

- Built a bilingual (Arabic/English) e-commerce platform for personalized children’s books, from product customization through cart and checkout, delivered as paid client work.
- Designed an AI-assisted payment verification pipeline: customers upload payment receipts, Google Gemini analyzes the receipt image, and admins approve or reject via a Telegram bot with webhook-driven actions.
- Implemented server-side payment validation and used Upstash Redis to persist payment state across the review workflow, keeping customer-facing status in sync with admin decisions.
- Built the cart/checkout flow with Zustand and implemented Arabic/English localization with full RTL support.

Rento – Car Rental & Marketplace Platform

Next.js, TypeScript, Tailwind CSS, shadcn/ui, React Query, Redux Toolkit, Zod, next-intl 2026

- Structured a Next.js App Router codebase using feature-based organization, keeping customer, trader, and admin flows independently maintainable.
- Implemented authentication, authorization, protected routes, and role-based workflows for customers, traders, and administrators.
- Split server-state (React Query) from client UI-state (Redux Toolkit) across bookings, orders, car management, and analytics to keep data flows predictable.
- Implemented Arabic/English localization with RTL/LTR support, form validation, and error handling throughout the booking flow.

Dental Clinic Management Dashboard

React, React Router, React Query, REST APIs, Material UI, Data Visualization 2024 – 2025

- Developed a role-based healthcare dashboard supporting six distinct roles (administrators, dentists, nurses, receptionists, accountants, and clinical staff) with permission-scoped navigation.
- Implemented modules for patient management, appointments, treatment plans, odontograms, inventory, billing, and accounting.

- Integrated REST APIs using Axios and React Query for data fetching, caching, and server-state management across clinical and financial modules.
- Built responsive dashboards with charts and tables to visualize clinical, operational, and financial performance; added PDF/Excel export and printable reports.

Education

Mansoura UniversityOct. 2021 – Jul. 2025

Bachelor of Computer and Information Sciences – Software Engineering

Mansoura, Egypt

National Telecommunication Institute (NTI)Apr. 2026 – Jun. 2026

Open-Source Applications Developer – 420-Hour Full-Stack Web Development Program
